OHINA SEA. SHANGHAI DISTRICT. Temporary withdrawal of the Kintoan Light-vessel.

NOTICE is hereby given that, on or about the 1st December 1896, the

Kiutoan Light-vessel Kintoan will be removed for repairs, and that the temporary Light-vessel Omega will take her place. The Ome a is a barque and painted yellow. Her Maintopmast, which is surmounted by a black ball, has a yard across, from each arm of which two fix d lights are suspended in a vertical line. The two upper lights are red and at a beight of 65 feet above the sea and the two lower ones white, at a height of 41 feet.

In clear whether the red lights should have a range of visibility of 8 miles and the white ones a range of 10 miles; A white light will also be exhibited from

annest to sunrise on the forestay at a height of 6 feet above the rail, to show the direction in which the Light-vessel is heading. During foggy or thick weather a gong will be sounded at intervals of one minute. If the Light-remel be driven from her proper position to one where she is of will not be exhibited, but a small fixed red 6.00 light will be shown at each end of the wessel; the ball will be struck as soon as (0 p asible and until atruck it will be aura

> N.B .- It may possibly happen that one or both of the vertical lights on one yard arm of the Umega may be obscured by her own masts, to a vessel that is approaching her when she is swinging across the tide. A. M. BISBEE,

THE REBELLION IN THE PHILIPPINES.

Accrespondent from Manila, who may be relied upon, writes to us (what we have already stated) that it 'seems' almost impossible to obtain any information of the rebellion. The Spaniards, he continues, dieton, and Capt. Mercer was exceedingly have got about 8000 troops now in Manila, the majority of them being apparently raw recruits, badly armed, and some of them without uniform. A small body of cavalry: men arrived with the last batch, but without horses, so they will have to be mounted Dalrymple, c Hyndman, b Smith. on the native ponies, which are as a rule wretchedly fed and would require at least a month to get into anything like decent condition. Two young fellows Spanish and one half-Spanish) murdered on the native lines about the beginning of the month. They went out to take photographs, but took rifles with them. They were fired on directly they crossed the Spanish lines, and they returned the fire. One hody has been found stripped; the other one is still missing. -

The Volunteers are the most usefullooking lot of men I have seen here. They Brown, c and b Gascoyne wer, banded at the beginning of the Rebellion, and number about 1500. They certainly march well, and are all armed with the old rifle. They are also well dressed, but they say that is as far as they go, and that they cannot indulge in rifle practice, as they are so badly supplied with ammunition. I understand that operations were commenced in carnest on the 7th inst. but up to that time nothing very serious had taken place. The rebels are now massed in one triangle of land connected with the main part of the island by two pecks of land passing on either side of a lake. The combined width of these strips is 16 miles. THE DISTRESSED JAPANESE STEAMER. MORE TROUBLE WITH THE JAPANESE. We have been able to gather some further details as to the position of the Nippon Yuson Kaisha's atcamer Himeji Maru, and the successful efforts to rescue the crew. The German steamer Siegfried left Hongkong on the 8th November, with a salvage party from the Docks and a number of coolies employed by the Company to remove thocargo from the distressed steamer. The Siegfried reached the Paracels reef about mid-day on the 10th November, and found north-west side of Bombay reef with a list about fourteen degrees to starboard. When the Siegfried appeared in sight the rigging of the disabled steamer was manued by the Japanese who cheered loudly as the ship approached. It was found imposible to approach near the vessel owing to the rough seas. Mr J. Gilchrist and Mr G. White, who were in charge of the salvage party from the Docke, pulled off to. the Himeji Mara in a small boat, and when nearing the ship the boat was capsized and they were left struggling the water, but they were both thrown on the reef by the heavy breakers and escaped with their clothes torn to shreds. On boarding the steamer it was found all the life-boats were lost, with the exception of one which was smashed into shapeless mass. The fore and mizzen topmasts had been taken down, and all the Only one man has been shot of later aspectore out away to make rafte which lay alongside the vessel. The engine room, stoke-hole and fore-hold were full of water to her to be ready early in the mornto launch the life-boats. Thurslay foremoon and afternoon were occupied in transferring the Japanese and their baggage to the Signfried. Consderable difficulty was experienced in this work as there was a heavy sea on. On the second voyage of the life-boat, with the chief officer of the Siegfried, the boat was badly smashed on the reef, but she was temporarily repaired in a few hours, and was again in use about four o'clock in the afternoon. Two boats were requisitioned to take off the orew-a large-life, boat and an iron boat, the former capable of holding about twenty persons and the latter about eight. Great annovance was caused by the Japanese who refused to leave the ship without THE sensible men among the respectable dragging large boxes and other baggage with them into the boats. The Captain reported that he had great trouble with the orew when the ship went on shore. On Friday morning, however, the crew, with the exception of the Captain, the purser, second engineer, a staward, a boy and cook, were transferred to the Sienfried and she steamed off to Hongkong. credit is due to the chief and officers of the Sienfried for the way which they worked to resoup the crew from the Himeji Maru. Hongkong Tides.

The Tide table given below has been compiled by the Nautical Almanac Office in London from the results of the analysis of observations taken by means of an automatic tide recording machine in the Water Police Basin at Taim Sha Tsui during the years 1887-8-9.

The zero of the table is Low Water Ordinary Spring Tides, which has been found to be 2 feet below mean sea level. To obtain the depth of water on the tide gauge at the Victoria Naval Yard add 5 ft. in., and on the gauge at Lamont Dock, Aberdeen, add 12 ft. 9 in. to the height given in the table.

CHINESE AND JAPANESE QUEUES. Some Japanese papers have insisted that the Chinese in Formona should be ordered to cut off their queues, as the first stop in Japanese civilisation, and it is quite possible appendage would be used in some more rational way then; but says the Eastern World, our Japanese friends themselves are given in the Japan Mail as follows :-have a few queues to cut off, and two may mention one that seems to belong to the bably have never see you, but I gathered

amongst our new neighbours we also have the world. Dead men tell no tales; no, rank of a well-connected samurai. We infer this at least from the great popularity

fool. And then I came to him. What is under the difficulty of being stone deaf, too, the result? We between us electrify for to call his attention to the fact that Japan. I have never professed to be a some one has a little job for him it is neces- good woman, but for the sake of a few sary to beat a tomtom, the favourite instru- lines, I do not see why I should let a silly ment of the untutored African, who would introcent woman be condemned for what make a meal of his grand-father; to its she knows nothing about, and for what enlivening tune. To wake up the stone fox she never will know anything about, and the tomtom is beaten with great energy for for which when you get this no one on this about an hour very early in the morning, carth could enlighten her. She is a silly and that wakes up everybody else in the fool, otherwise she would not have treated neighbourhood, too; we presume so, at the hat two weeks as she has done. By least. The god is then ready for business, but from our observation, made on Sundays and evenings, it seems our neighbour, the may call this what you like, but I think god; dozes off again as soon as the tomtom deep down in my heart. I write this for PRICE ceases to be tomtomed, so that every new the sake of the boy who is like his father. client has to beat it again or pay some one Let his mother take heed that he enter not else to do so, but in any case enough comes | into temptation. in to pay the rent. Sometimes when business is brisk the toutom is kept going till late in the night.

Now it seems to us that there is a pretty long queue there that needs cutting off. Imagine, here we have a people whose ships to-day plough the seas of the world drumming to a stone fox by the hour, in the belief that it will arrange all such of their affairs for them as they themselves cannot manage. Here we have the same people, whose works of art delight the iron West, using the instrument of the African savage, in what must be presumed to be the worship of a superior being-Inartanma-in the shape of a stone for, to whose principal shrine at Haneda prefect pilgrimages take place on the 11th of every month. Well, to sum up, we think the tomtom must go; it is one of the queues that Japan of to-day will have to cut off, and if the tomtom goes, all-the stone foxes in the country will follow it -Bungkok Times.

YARD AT NAGASAKI. The following description of the Mitsu-Bishi Dock and Shipbuilding Yard at Nagasaki has been published in the leading out to meet her maker: Tokyo papers :-

Rails are being laid between the shops and godowns in the Akunoura Engine Works and the Tategami dock yard, in order to facilitate the transmission of material. Amongst the jobs now in progress, the principal is the construction of a steel steamer of about 1,500 tons for the Osaka Shosen Kaisha; a steamer of 5,400-tons for the Nippon Yusen Kaisha; a steel steamer of about 2,540 tons for the transport of coal for the Mitau Bishi Company, asteam launch (about 50 feet long) for the same company; a unmber of caissons for the dock, and mining apparatus. Investigations were made by the Bakufu constructed by the Imperial Government in 1875, the work being completed in 1879. At first the dock was only 420 feet long. It was extended a few years ago by about 100 feet, and its total length is now 522 feet, 517 feet on the blocks; width 89 feet at the top and 77 feet at the bottom at the entrance, so that it can accommodate a vessel of very large size. The basiness brought to the dock having sensibly increased of late, another dock, 371 feet long, 360 feet on the blocks, 66 feet wide at the top and 52 feet at the bottom at the entrance is being added. It is to be completed before the end of this month. The Kosuge allo was made in 1876 by

There are 30 heads of departments, 17 mechanical and 13 administrative, in the Mitsu Bishi Shipbuilding yard, some being Chinamen, in addition to six foreign engineers and one general secretary. Under these there are 87 native general clerks and over 2,000 skilled mcchanics and about 1,500 ordinary coolies daily amployed. The yard keeps four steam launches and 90 other boats for con-veyance of mon and material, etc. One member of the foreign staff, Mr Clark (7) an English engineer, is a noted naval architect formerly retained by the Spanish Navy. REMARKS.

Unsurpassed as a tonic for the ladies. Once tried by them they will agree with the remarks of our other lady friends and continue to patronize us. For the gentlemen it is a cooling and refreshing drink. All who have tried it stand by it. We only ask one trial and will then rest on our merits.
